

CONTENT NOT APPEARING/DISPLAY ISSUES

Some course content in WTClass may not appear if you have not selected to view the content. Use one of the following methods to allow the content to appear:

Firefox – Select the “i” icon next to the web address, select the arrow next to Connection, and select to “Disable protection for now”

Chrome - If you see a shield icon in the address bar, click the shield, then select “Load unsafe scripts” to be able to view the content.

If you are unable to see these security warning, please close ALL of your browsers and try again.
